

Sprint 3 Schedule

What is necessary to keep the sprint on schedule:

- Define clear goals and deadlines in the sprint meeting and follow them throughout the sprint.
- Use Jira to keep track of tasks and what needs to be done, and use the story point estimates to divide up work throughout the sprint and allocate enough time to complete tasks.
- Attend regular standup meetings to discuss progress, what needs to be done and possible blockers as well as solutions to those blockers.

What went wrong:

- We were unable to test our NFC container scanning with the scanners and containers that Inwit uses because the product owner got sick and was unable to bring them to us at our in-person meeting on Tuesday.
- As shown in the diagram, due to the heavy workload we were unable to in a timely manner finish IN-72 and IN-73, which was a part of the critical path, setting back the development of IN-74 which relied on it.
